LBS Formaldehyde Reduction Service

Improve air quality and protect your health

Nano Catalyst & PDC-NANO patented technology

- Decompose harmful substances such as VOC and formaldehyde effectively
- Can penetrate to those small cracks of the material surface, decomposition can also be happened without light source
- Actively release reactive oxygen species, decompose harmful substances in the air, then convert them into harmless substances such as water and carbon dioxide
- Kill Germs > 99%

About Nano Catalyst

Decompose harmful substances without reacting with light source

	Nano Catalyst	Photocatalyst
UV-light	 Unnecessary	Necessary
Adhesive	Strong	Weak
Transparency	Transparent	Milky white
Durability	Durable	Deterioration

Protected by National Invention Patent and practically non-toxic
